

Dr. Stokes:

I am writing to ask that you please begin efforts to completely replace lethal dose testing with non-animal, in vitro testing methods. Please remember that as human beings we are called to stewardship of the animals and not dominion over them. We should not use the animals in ways that cause them to suffer simply because we can do so and deserve to be called abusers if we continue to force them to serve our needs.

Thank you for your time and consideration regarding this matter.

Sincerely,  
Sarah E. Fleming
